Crear un entorno virtual

Crea un entorno virtual mediante `venv`

- Ejecutar en su terminal: `python3 -m venv env` o bien `python -m venv env`

```
python3 -m venv env
```

`python -m venv env` Ahora tienes un directorio (folder) `env` creado en tu terminal.

- Ejecuta el comando para activar el entorno virtual: `source env/bin/activate`

Activar Windows

Ve a Configuración para activar Windows.
